THE SITTING CONCEPT FOR FEELING YOUR BEST

Compact and Comfortable: No Longer a Contradiction.

Compact tractors like those used in vineyards and hopfields, for example, have only limited space for the driver seat. So it's a good thing that GRAMMER is now presenting the Primo® Professional: an innovative, compact tractor seat with a low-profile, low-frequency pneumatic suspension that meets precisely this challenge. The suspension absorbs vertical vibrations to significantly enhance the driver's comfort. And because it has a Seat Index Point of 238 mm, it can be taken advantage of to deliver unprecedented driving and suspension comfort on nearly any compact tractor.

Perfectly Supported in Every Direction.

The ergonomic cushions of the Primo® and its height- and angle-adjustable armrests optimally support the body. So does the backrest, the angle of which can be varied between -5° and +30°. The Primo® also provides firm support when driving backward: the backrest is asymmetrical, tapering on the right-hand side so it's easy to turn around in the seat. For the sensitive lower back, the Primo® is the world's first compact low-profile seat to come with a lumbar support. The backrest height can also be adjusted through 13 steps by up to 170 mm to suit every body size and work situation.

Quick Achievement of the Ergonomically Best Sitting Position.

Genuine comfort can only be had from a seat that is optimally adjusted to its occupant's body. But what if the driver isn't familiar with all of the seat's functions and therefore doesn't use them properly? GRAMMER has solved this problem with its innovative "Design for Use" concept. All controls are located where the driver can intuitively find them. Each has a different shape to prevent confusion. This lets every user quickly and easily set the seat to suit their personal needs without having to study the manual first.

● Standard features ○ Optional features

Extremely Low-Profile Air Suspension

Another innovation from GRAMMER: a pneumatic suspension with 12-volt compressor for compact tractors. This low-frequency suspension gently absorbs even the most brutal jolts and vibrations to ensure a smooth, relaxed ride in any work situation. This protects the spine and its disks.

Folding Armrests (optional)

With adjustable height and angle.

Seat Heating (optional)

For a consistently pleasant seat climate.

Weight Adjustment

Weight adjustment range: 45-170 kg, a pneumatic system makes it quick and easy.

Fore/Aft Adjustment 210 mm

For easy positioning within the vehicle.

Low-Frequency Air Suspension

Adjustable Backrest Angle

In 13 steps from 475 to 645 mm for precise adjustment to the operator's body size.

Asymmetrical Backrest

For more elbow room on the right and full back support on the left side of the seat. This allows greater freedom of movement when driving in reverse.

Lumbar Support

Adjusts quickly and precisely to the back for optimum support.

Adjustable Backrest Angle

Settable between -5° and +30° in 2.5° steps.

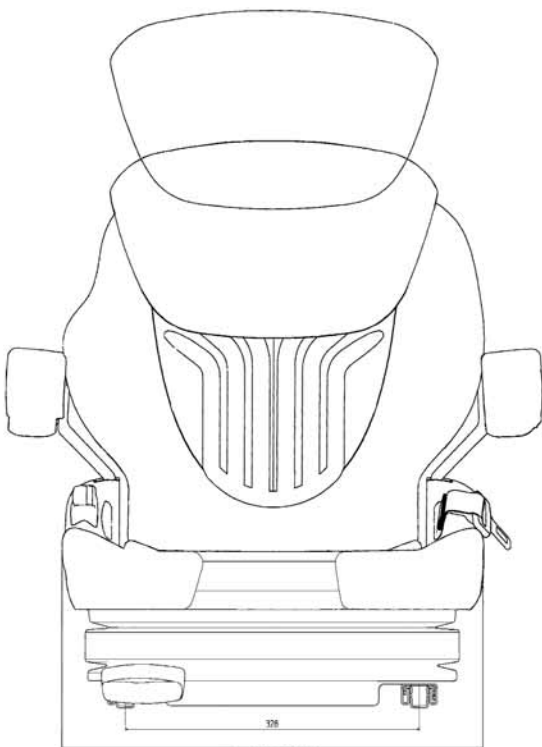

Height adjustment 60 mm

The ideal sitting position for every body size.

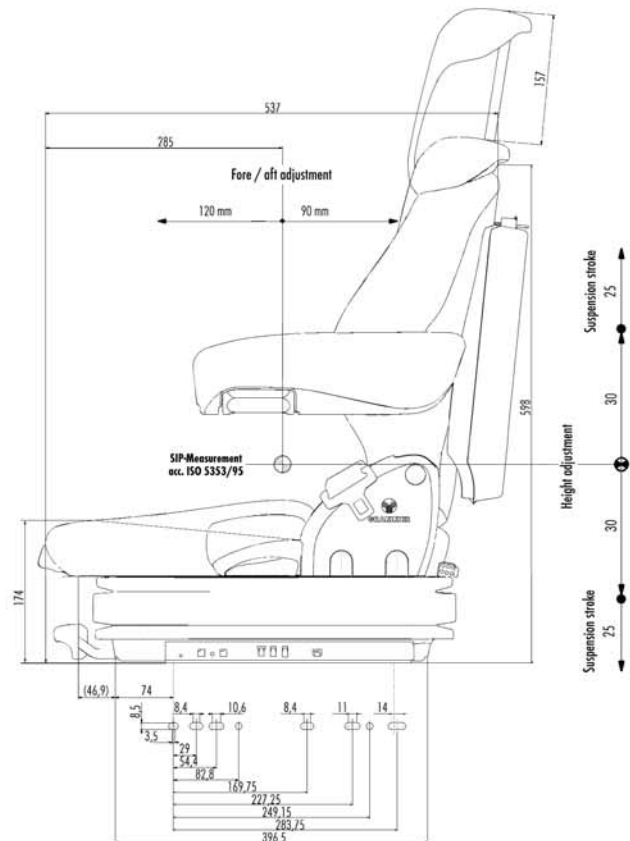

The model shown may deviate from the standard configuration.
